We sincerely appreciate your business. We have made every effort to insure the accuracy of descriptions and prices in this catalog. However, we are not responsible for typographical errors that may occur. Thank you for letting us serve you.

Some Significant Features of The Sanding Glove®

Virtually eliminates the fatigue associated with sanding by hand.

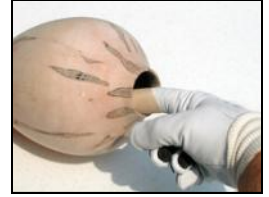

Allows the user to easily sand in places that were previously difficult to reach.

Makes the task of hand sanding very easy, even for people with arthritis.

Simplifies nuisance tasks such as sanding a dowel rod or chair rung.

Can be utilized by almost anyone sanding anything:

- Woodworkers
- Woodcarvers
- Woodturners
- Chair-makers
- Furniture refinishers
- Homeowners, for drywall repairs or painting preparation
- Boat-builders and restorers

****NEW! Now available with an adjustable Velcro® wrist closure****

“A most natural way to sand with a heightened sense of feel. Almost as if your fingers were coated with abrasive.”

The Sanding Glove®

Available in S, M, L, XL, 2X (Right or Left hand) \$ 16.95

The Sanding Glove® Kit

Includes Glove, 3 Interface pads, & 25 discs \$ 49.95

Made of natural goat leather with genuine Velcro.

Our users agree... A real time and fatigue saver, comfortable, ergonomic, no more cramped and aching fingers.

Stick-Fast™ Cyanoacrylate Adhesives

Stick-Fast™ cyanoacrylate adhesives are triple distilled to 99.5% pure. This high level of purity gives them superior strength, shorter cure times, and helps increase shelf life. They are MADE IN THE USA. THIN is water thin and fast setting; very suitable for wicking into cracks for repairs, and penetrating wood to seal and harden the surface. MEDIUM is a thin syrup consistency and has a slightly longer set time, and can fill gaps up to 1/32". THICK has a molasses like consistency, and a longer set time (allowing time to align parts). Well suited to filling large cracks and joining uneven surfaces. The activator speeds up set-times to allow for faster curing.

Stick-Fast™ CA Glue

A	2 oz. bottle Thin CA	\$ 5.95
B	2 oz. bottle Medium CA	\$ 5.95
C	2 oz. bottle Thick CA	\$ 5.95
D	Activator - 2oz Mist pump	\$ 3.95
E	Activator - 6oz Aerosol	\$ 7.95
F	DeBonder - 2oz Bottle	\$ 4.95
G	Flexible Tips (package of 25 tips)	\$ 3.50
H	Kwik-Frame 12oz Aerosol Activator (very fast set time - 1 to 2 seconds)	\$ 13.95
I	Starbond - Black CA - 2oz	\$ 12.00
J	Starbond - Brown CA - 2oz	\$ 10.00
K	5 Bottle Glue Caddy	\$ 11.95
L	Starter Set (Includes caddy, 2 oz. thin, med, & thick, 6 oz. aerosol activator, & de-bonder)	\$ 39.95
M	5 - Minute Epoxy Kit: 2 part; 8oz	\$ 10.95
N	20 - Minute Epoxy Kit: 2 part; 8oz	\$ 10.95

(H) **Kwik-Frame** activator is "lightning fast". Use it to saturate the area around a fine crack before gluing to avoid "blotches".

(I,J) **Starbond** colored glues are great for repairing cracks and bark or filling around bark inclusions. The colors can be much more appealing than clear glue. Black is also available in FLEXIBLE formula.

(G) **Flexible Tips** will offer you pinpoint application of thin and medium glues helping you to avoid messy repairs.

(M) **Stick-Fast Epoxy** is available in both 5 and 20 minute formulas. It is a 2-part epoxy. **5 Minute-** has a working time of 3 to 5 minutes and will cure to full strength in about 1 hour. **20 Minute-** has a working time up to 20 minutes. Full cure is reached in about 6 hours.

(K) The **Glue caddy** easily organizes your bottles and prevents spilling and mess.

Genuine Velcro® material in sheets

These materials can be used for making repairs to disc holders and fabricating new devices. The Velcro pre-glued to a foam backing is especially versatile for special projects and designs.

Velcro hook and loop sheets

Velcro & PSA face pre-glued to foam backing

VHK-612-C	Velcro HOOK material - Cloth backed	6" x 12"	\$ 7.95

GOOP-100	GOOP household adhesive	Tube	\$ 4.95

Velcro® Disc Holders (Sanding mandrels)

Our premium Velcro® disc holders have a 1/4" steel shaft for mounting in a drill. They have genuine Velcro® hook material on the face. We offer various densities which adds versatility to the line. Firm holders are made of black neoprene and can be used for aggressive sanding and shaping tasks. Medium density holders are a cream color and are typically used with lower grit discs (80 thru 180). Soft holders have a soft gray foam which lends itself well to interior and exterior contours and provides a softer touch with grits 220 and above.

Our 3 1/2" and 5" disc holders can significantly reduce sanding time on larger turnings. The increased abrasive surface sands faster at slower speeds and runs cooler adding to efficiency and long life.

Manufactured in the USA

Part #	Description	Price
SM-1M	1" Disc holder (Medium density)	\$ 6.50
SM-112M	1 1/2" Disc holder (Medium density)	\$ 7.95

Self-Centering Collet style Sanding Extensions

NO more run-out ! NO more wobble!

The unique collet design w/locking collar on our sanding extensions is self-centering and runs true. NO set screw in the side to push the disc holder off center. The heavy-duty shaft is machined to fit any 3/8" drill. Using these extensions will allow you to reach into restricted access areas. Offered in 3 1/2" and 6" lengths. They will accept any of our Velcro and PSA disc holders sold above. The 3 1/2" extension can be used with disc holders from 1" up to 3" in diameter and the 6" should be used with holders up to only 2" to provide better control of the sanding process.

We recommend that you use our Red disc holders (sold on page 16).

SIMPLY the BEST extensions available!

EXT-3500 3 1/2" length \$16.95

EXT-6000 6" length \$19.95

Foam Interface Pads

Our premium Velcro® interface pads have genuine Velcro® hook and loop material on the faces. We offer various densities and thicknesses which adds versatility to the line and provide the user with a wide range of possible applications. Firm and Medium pads can be used for protecting the high cost pads found on pneumatic and electric power sanders. Soft interface pads are available in 2 thicknesses and have a soft gray foam which lends itself well to interior and exterior contours and provides a softer touch with grits 220 and above. They work well on power tools, random orbit sanders, disc holders, and hand-held holders. Our 5 inch pads are used to convert your random orbit sander into a contour sander with any grit abrasive. **Manufactured in the USA**

Part #	Description		Price
IP-2F	2" Firm Pad	(1/4" thick * black neoprene)	\$3.50
IP-2M	2" Medium Pad	(1/2" thick * white vinyl)	\$3.95
IP-2S	2" Soft Pad	(3/4" thick * gray foam)	\$3.95
IP-2XS	2" Extra Soft Pad	(1" thick * gray foam)	\$3.95
IP-3F	3" Firm Pad	(1/4" thick * black neoprene)	\$4.95
IP-3M	3" Medium Pad	(1/2" thick * white vinyl)	\$5.95
IP-3S	3" Soft Pad	(3/4" thick * gray foam)	\$5.95
IP-3XS	3" Extra Soft Pad	(1" thick * gray foam)	\$5.95

IP-35M	3 1/2" Medium Pad	(1/4" thick * white vinyl)	\$5.95
IP-312S	3 1/2" Soft Pad	(1/2" thick * gray foam)	\$6.95
IP-35S	3 1/2" Extra Soft Pad	(1" thick * gray foam)	\$6.95
IP-5M	5" Medium Pad	(1/4" thick * white vinyl)	\$8.95
IP-5S	5" Soft Pad	(3/4" thick * gray foam)	\$9.95
IP-5XS	5" Extra Soft Pad	(1" thick * gray foam)	\$9.95

IP-100 has Velcro hook on one side of a medium density foam body.

New! **IP-200-2S** has Velcro hook on both sides of an intermediate density foam body. This **unique** design allows the user to have abrasive discs of varying grits on 2 sides, and even make use of adding a 3" soft interface pad.

Half-Round

Hand Sanding Devices

IP-100	Hand-held insulating disc holder	\$9.95
IP-200-2S	Hand-held insulating & contouring disc holder	10.95
IP-105V	Half-round hand pad for use with a 5" disc - Velcro	4.25
IP-105P	Half-round hand pad for use with a 5" disc - PSA	4.25

Surbuf® Buffing Pads

Can be used for many tasks - buffing, waxing, polishing, etc.

SUR-214	Surbuf 2 1/4" Buffing Pads - 2 Pack	\$3.00
SUR-314	Surbuf 3 1/4" Buffing Pads - 2 Pack	\$4.25
SUR-3x5	Surbuf 3" x 5" Buffing Pads - Single	\$2.00
SUR-512	Surbuf 5 1/2" Buffing Pads - 2 Pack	\$14.95

Surbuf Buffing pads: Unlike cotton, wool, or regular foam pads, **Microfingers®** technology minimizes surface load-up and allows every part of the surface to be buffed

and shined for a swirl-free finish that looks better than a hand-rubbed finish. Use for wax, polishing compounds, etc.

3M 900DZ Cubitron™ Ceramic Sheets

What's so special about the **Purple Ceramic ? Cubitron** abrasive grain developed by 3M provides revolutionary performance that has made this the flagship of the coated abrasives produce line. The grain is designed to fracture and continually expose fresh cutting edges giving them a **life that is at least 5 to 7 times longer than standard abrasives**. Many of the professional turners using these Ceramic sheets are reporting a life span that far exceeds that. Tear resistant J weight cloth backing gives them flexibility, and loading and clogging is minimized due to Xodust dust treatment technology throughout the grain. Performs well on all wood species, and provides a very consistent and uniform finish. The extra long life of this abrasive makes it an especially good value.

9" x 11" Sheets	900D-911-120	120 Grit	\$4.75 ea
	900D-911-220	220 Grit	\$4.75 ea

Features

Premium heat-treated aluminum oxide abrasive, P-graded

Flexible, fiber-reinforced backing

Non-pigmented, waterbased stearate (anti-clog) coating

No color dye in coating process

Benefits

= 3X longer life and 3X faster cut rate over conventional A/O products

= Excellent life, flexibility and tear resistance when folded

= Best resistance to clogging and loading during sanding

= No chance of color transfer to work

Each Pack contains 20 sheets

3XS-080-20	80 Grit	\$12.95	3XS-180-20	180 Grit	\$9.95
3XS-120-20	120 Grit	\$12.95	3XS-220-20	220 Grit	\$9.95
3XS-150-20	150 Grit	\$12.95	3XS-320-20	320 Grit	\$9.95
			3XS-400-20	400 Grit	\$9.95

Premium, P-graded aluminum oxide abrasive grain bonded to a B-weight, fiber reinforced,

latex saturated backing, which is very tear resistant for durability. It offers a fast cut rate with extended life and a consistent finish. Coated with a water-based, non pigmented stearate to provide maximum load resistance, with no color transfer to the work.

New!

Each Pack contains 5 sheets

275-90600-5	600 Grit	\$3.95
275-90800-5	800 Grit	\$3.95
275-91000-5	1000 Grit	\$3.95

3M Wetordry Polishing Papers 281Q & 481Q

These Wetordry polishing papers from 3M can be used wet or dry on anything you want to put a superior finish on. 481Q is a silicone carbide grain and is used on the 30 and 15 micron sheets. 281Q is an aluminum oxide grain pulverized to be micron graded. Both have a very sharp grain and will produce a rapid finish. Coated on a fibrous backing which is extremely flexible and disperses heat well, and they are color-coded for easy identification. Performs well on wood (especially exotics), acrylics, metals such as copper, and on inlay. Use them by hand or adapt them for use on a foam backer or with a drill and disc holder. Superb for pen makers or persons working with inlay. Comes in 4" x 6" sheets.

Assortment package comes with 3 each of 6 different grits (400, 600, 1200, 3000, 6000, 8000)

Assortment pack WOD-281-481Q \$8.95

Easy-Sand steel wool sheets

The fibers in this material are only about 1/4" in length. It will not tangle when used on the lathe like regular steel wool will do. Simply cut it into 3" squares and fold to use on finials, pens, etc. Can be used for larger surfaces as well.

EZS-4	9" x 11" Sheet - #0000 (Fine)	\$ 2.50
EZS-6	9" x 11" Sheet - #000000 (Super-fine)	\$ 2.50

Speed-Grip Discs

(Velcro-backed)

Superb performance, flexibility and long life make these a disc you won't want to be without. Compare them to any standard disc you currently have and see for yourself their performance and value. For use with any Velcro disc holder.

FEATURES

Premium heat-treated aluminum oxide abrasive grain

Unique fiber-reinforced, B-weight latex saturated paper backing

Water-based stearate, non pigmented latex No-Fil coating

BENEFITS

30% - 50% faster cut rate w/extended life, consistent finish

50-60% improvement in tear strength
*More flexible *Can be used wet

Provides maximum load resistance and extended life; no color transfer to work.

Speed-Grip Discs

Same superb discs but in a smaller size for tight access areas. Great for sanding the foot or bottoms of any bowl or vessel. We offer the disc holders for these small sizes on page 6.

Finer grits available on request.

TIP:

Keeping your discs clean using a cleaning stick or compressed air will help your discs last longer and leave a better finished surface.

Belt cleaning stick for maintaining your discs.

3M Scotch-Brite™ Radial Bristle Discs

These radial bristle discs are designed for wood or metal applications and will allow you to sand in places that have been unreachable up to now. Excellent for de-burring, de-fuzzing and sanding of irregular surfaces. 80 and 120 grits can be used for shaping, 220 for fine sanding, and 400 will finish up and bring a sheen to the wood surface.

"3M Radial Bristle discs are excellent for cleaning up the "fuzzies" left when piercing. They save a lot of time and effort."

Binh Pho

3M 900DZ Cubitron™ Ceramic Discs

Rapid cut rate - Extra long life

What's so special about the Purple Ceramic discs? Cubitron abrasive grain developed by 3M provides revolutionary performance that has made this the flagship of the coated abrasives produce line. The grain is designed to fracture and continually expose fresh cutting edges giving them a life that is at least 5 to 7 times longer than standard abrasives. Many of the professional turners using these Ceramic discs are reporting a life span that far exceeds that. Tear resistant J-weight cloth backing gives them flexibility, and loading and clogging is minimized due to Xodust dust treatment technology throughout the grain. Performs well on all wood species, and provides a very consistent and uniform finish. The extra long life of this abrasive makes it an especially good value. These discs come with a PSA (pressure sensitive adhesive) peel and stick backing. We offer conversion discs so they can be used on standard Velcro disc holders, and also a line of PSA disc holders if preferred.

"These new ceramic discs are the best I have ever used."

Michael Hosaluk

"Best innovation in woodturning since the Center-Saver. The benefits outweigh the costs." Mike Mahoney

"Simply the best sandpaper available today"

Dave Lancaster

PSA Disc Holders (for adhesive backed discs)

Requires a separate holder for each grit used.

Part #	Description	Price
PSM-1M	1" Disc holder (Medium density)	\$ 6.50
PSM-2M	2" Disc holder (Medium density)	\$ 8.95
PSM-2S	2" Disc holder (Soft density)	\$ 8.95
PSM-3M	3" Disc holder (Medium density)	\$ 9.95
PSM-3S	3" Disc holder (Soft density)	\$ 9.95
PSM-5M	5" Disc holder (Medium density)	\$ 15.95
PSM-5S	5" Disc holder (Soft density)	\$ 15.95

TIP: Replacing a PSA disc: After removing the abrasive disc from the conversion disc or PSA holder, use mineral spirits to clean it before attaching a new ceramic disc. Be sure to allow time for the spirits to completely dry. This will insure good adhesion.

Velcro to PSA conversion discs ►

Our **conversion discs** allow you to use these PSA ceramics on any standard hook and loop disc holder. It requires a separate disc for each grit used so that the adhesive joint is left intact until it is time to change the abrasive. They provide you the flexibility to choose between using your ceramic discs aggressively or with a lighter touch for tight contours. Our FLAT discs are about 1/16" thick and are used directly on your disc holder. For a softer touch, use our SOFT conversion discs which are made from 3/4" soft foam. For additional

ways to vary the firmness, use the flat conversion disc in combination with any of our extensive line of foam interface pads (page 7).

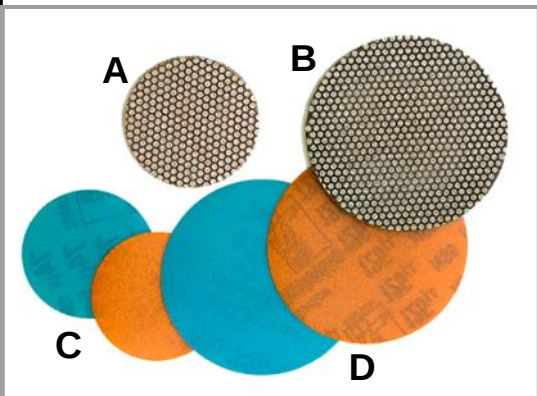

3M Super Abrasives - Diamond Discs

Flexible Diamond Discs - COARSE

Designed for fast finishing on stone inlay, glass, ceramics, non-ferrous metal, etc.

These Hookit™ (loop backed) discs have micron graded diamond, metal-bonded into the nickel “islands” on the disc surface. The islands are resin-bonded to a strong flexible backing in an open dot pattern. They have a very aggressive cut, but produce a consistent scratch pattern. They will cut better and last longer if used with a little water or at least dampen them during use. Non-loading, simply wash or blow them out to clean. These are 250 Micron (approximate equivalent - 70 grit). Use the Diamond Microfinishing Film sold below after leveling to further refine the surface.

A	500D-2070-1	2" 250μ (micron)	(70 grit)	\$ 17.95 ea
B	500D-4070-1	3" 250μ (micron)	(70 grit)	\$ 37.95 ea

Diamond Microfinishing Film

Designed for fast finishing on stone inlay, glass, ceramics, non-ferrous metal, etc.

These Hookit™ (loop backed) backed discs have micron graded diamond mineral electro-static coated and resin bonded to a 5 mil polyester film backing.

These discs are the best choice to provide the finer finish needed after leveling using the 500D above as they will leave a very consistent scratch pattern. They will far out perform aluminum oxide discs for this task as those can leave inconsistent scratches and wear out quickly. Can be used wet or dry; wash to clean.

	Part #	Size, Micron Grade & Grit equivalent		Pack	Price

D	675L-3120-2	3" 125μ (micron) (Orange)	120 grit	2 pack	\$6.95
	675L-3220-2	3" 74μ (micron) (teal)	220 grit	2 pack	\$6.95
	675L-3320-2	3" 45μ (micron) (beige)	320 grit	2 pack	\$6.95

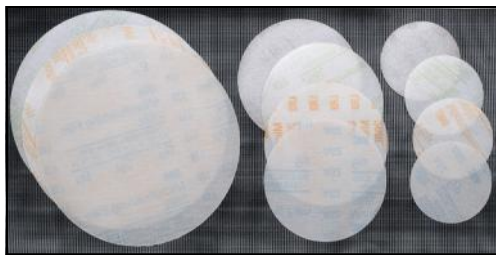

WHAT IS MICRON GRADING ?

This grading system is more precise than the grit grading process. The abrasive grain size is more stringently controlled and used in making products that can leave a superior finish with a more consistent scratch pattern than grit graded abrasives.

MICRON grading is used in our **3M** Diamond discs above, and **3M** 268L Microfinishing discs on the following page, and in our Wetordry Polishing Paper on page 8.

WHAT ARE THE BENEFITS OF FILM BACKING ?

3M Film backed discs are made using a high-strength polyester film backing ranging from 2 to 3 mil in thickness. This is the FLATTEST material that an abrasive can be bonded to. As such, it does not allow the abrasive to “sink” into it as a paper back will allow. The result is a very durable, flexible, and longer lasting abrasive. FILM backing is used on the **3M** Diamond discs shown above, and on 255L, 260L, and 268L abrasives on the following page.

3M 268L Micro Finishing Discs

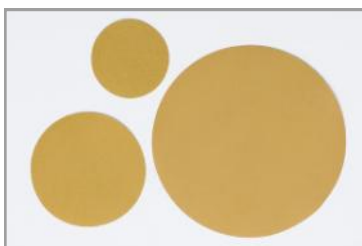

Size		2"		3"		5"

These 268L Micro Finishing discs are **MICRON GRADED** aluminum oxide grain; resin bonded to a high strength polyester 3 mil Film backing (see page 12) for excellent flexibility and durability. They are color coded for easy selection of grit. Can be used wet or dry and can be cleaned easily with a damp sponge. An **EXCELLENT** choice for use on exotic woods. Pen makers can use them on wood, plastic, or even metal barrels with superior results.

Can be used wet or dry and can be cleaned easily with a damp sponge. An **EXCELLENT** choice for use on exotic woods. Pen makers can use them on wood, plastic, or even metal barrels with superior results.

3M 255L Gold Film Discs

These high grade discs from 3M are a premium aluminum oxide mineral, resin bonded to a 2 mil film backing (see page 12) for excellent flexibility and durability. They have a

load resistant stearate coating. Hookit™ attachment backing works with all standard disc holders. They have an aggressive cut for rapid leveling and provide a very uniform, and consistent finish.

These 260L Finishing Film discs are made for finishing your finishes (lacquer, varnish, etc). Film backed for durability and flexibility and coated with a high performance aluminum oxide grain. Can be used wet or dry. They are steared to be non-loading and can be cleaned easily with a damp sponge. Use for leveling between coats and removing orange peel. They will bring a high sheen when used through 1500. Can be used on wood or metal to produce a consistently fine finish.

"I find 3M 260L discs ideal for leveling my lacquer finishes." Binh Pho

SIASOFT Abrasive roll

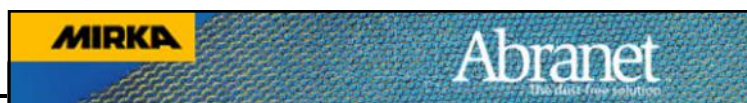

New!

High grade aluminum oxide abrasive electro-static coated on a flexible cloth backing, bonded to soft foam padding.

Just right for hand sanding projects, carvings, spindle turning, and excellent for Wet Sanding. Very good wear life with a fast cut rate.

Size	Grit	80	100	120	150	180	220
1 Yard Roll	\$6.95	SIA-S080-1	SIA-S100-1	SIA-S120-1	SIA-S150-1	SIA-S180-1	SIA-A220-1
10 Yard Roll	\$57.95	SIA-S080-10	SIA-S100-10	SIA-S120-10	SIA-S150-10	SIA-S180-10	SIA-A220-10

This unique patented sanding material is an open mesh that contains thousands of small holes. It is an aluminum oxide grain resin bonded to a polyamide fabric which is durable and long lasting.

It will clean easily by blowing

it out with air, tapping it on a hard surface or by washing. It produces a very uniform sanding pattern and a perfectly smooth surface. Can be used for sanding WET or GREEN wood, as well as dry wood and simply will not clog like other abrasives. We recommend the use of our Protector Pads with this abrasive to prevent damage to the hook material on your disc holder, *and provides a much better grip on the abrasive.*

2" & 3" Starter packs contain 5 discs each of 80, 120, 180, 240, 320, & 400 plus 1 protector pad.

ALSO AVAILABLE IN 3" X 4" SHEETS FOR HAND SANDING

When sanding by hand, these squares can be more convenient than discs. Holding them however is sometimes awkward, so we made the pads below just for this purpose. The medium pad is for use with the lower grits for initial sanding. It has a Velcro face and should be used with the 3 x 4 protector pad to increase the life of the pad. When a lighter touch is desired, the soft pad attaches to the medium also using the protector pad. This is ideal for the finishing grits and very contoured applications.

They are very comfortable in the hand and make hand sanding a breeze.

3" x 4" Starter Pack contains 5 each of 80, 120, 180, 240, & 320 grits.

**MIRKA****Abralon®**

Mirka Abralon discs are a silicone carbide abrasive bonded to an extremely flexible knitted fabric on soft foam with a loop (Velcro) backing. Excellent for dry or wet sanding of wood surfaces, plastics, acrylics, exotic woods. It performs

extremely well on lacquer and urethane finishes. They will conform to any surface contour and give a light touch on small and rounded edges. Typically outlast standard abrasives and can be cleaned with compressed air or by washing. Grits available from 180 to 4000. The 6" discs are ideal on finishes when used on a 5" random orbit sander with one of our soft interface pads.

3M SandBlaster™ Flexible Sanding Pads

These flexible pads last up to 7 times longer than conventional abrasives of comparable grits. The patented 3M Cubitron™ mineral levels surfaces quickly and consistently. Flexible enough to conform to contoured surfaces and the backing resists heat transfer making it comfortable to handle. Washable and clog resistant. The

response we've had from many woodturners has been positive. You will find many uses for these beyond the shop. Use them around the house for repairs and touchups, etc.

The Sanding Solution™

*"Ultimate performance & versatility
in a self-powered sander"*

"The Woodturners Friend"®

The concept of self-powered (or passive) sanding is not new. However the features we incorporated into the design of The Sanding Solution provide the user with ultimate performance and versatility not found in any other sander. One of the more significant advantages of this sander is that it will remove the radial scratches power sanding leaves behind. It can be used in a variety of configurations to accomplish the different tasks at hand.

By attaching the optional 16" extension you can easily sand the interior of tall vases and hollow vessels!

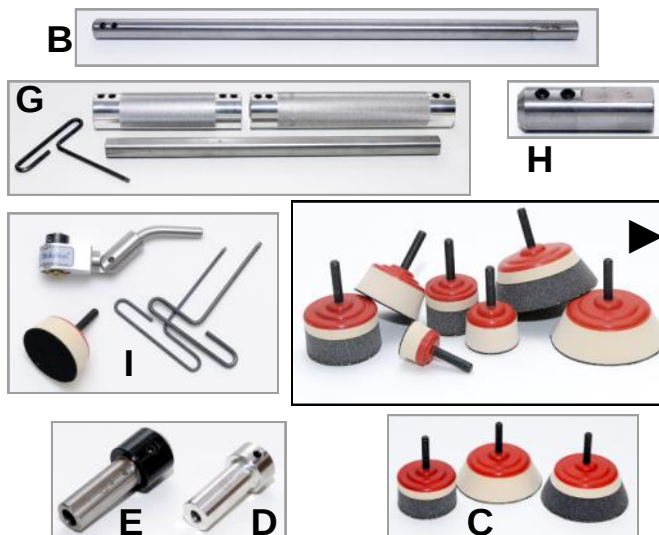

Top Quality Construction Features include:

- *TWO high-speed sealed ball bearings!
- *Quick-Change head
- *Knurled aluminum handles
- *Fully articulated positioning joint

"This is the best tool I have ever used that is really effective for sanding vessel interiors. Nothing else works as well."

Cindy Drozda

DH-3S-R	3" Disc holder (Soft density)	\$ 9.95

The Basic Solution™

The Basic Solution™ is the little brother to The Sanding Solution™. We designed this unit for those who turn only small bowls, vessels, and have no need to sand deep interior surfaces. It has the same dual-bearing, quick-change head as its older sibling, with the same great performance.

TBS-500 \$ 79.95

Angle-Head Drill

This angle-head drill (often called a close quarter drill) is very popular among woodturners for power sanding. It's ergonomic design makes it more comfortable than a standard drill when sanding. The unit has a 3/8" chuck and a reversible, variable speed range of 0-1400 rpm. Used with our Velcro disc holders (on page 6) it can make your sanding tasks much easier and faster.

Standard keyed chuck (pictured) 38D-01400 \$ 59.00

NEW Model !

38D-01400-K \$ 79.00**

**Speed-Set trigger control**

Maintains constant speed on angle head model drills while REDUCING FATIGUE!

**SS-100 Speed-Set \$5.95
SS-105 Service Pack \$1.49**

**Metabo Random Orbit Sander**

This light and handy machine is very suitable for inside and outside curved surfaces. It's ergonomic design makes one handed operation easy. The random orbit action (1/8")

leaves a very smooth and consistent finish. The head is 3 1/8" in diameter. Our interface pads (shown below) allow you to use all of your 3" discs to sand inside and outside contours easily. Variable electronic speed control will adapt to any desired task. Manufactured in Germany.

SXE-400 \$ 137.95

Interface Pads

Firm and Medium pads can be used for protecting the high cost pads found on pneumatic and electric power sanders. Soft interface pads are available in 2 thicknesses and have a soft gray foam which lends itself well to interior and exterior contours and provides a softer touch with grits 220 and above. They work well on power tools, random orbit sanders, disc holders, and hand-held holders.

IP-2F	2" x 1/4"	Firm density pad	\$ 3.50
IP-2M	2" x 1/2"	Medium density pad	\$ 3.95
IP-2S	2" x 3/4"	Soft density pad	\$ 3.95
IP-2XS	2" x 1"	Extra Soft pad	\$ 3.95

IP-3S	3" x 3/4"	Soft density pad	\$ 5.95
IP-3XS	3" x 1"	Extra Soft pad	\$ 5.95
IP-5M	5" x 1/4"	Medium density pad	\$ 8.95
IP-5S	5" x 3/4"	Soft density pad	\$ 9.95
IP-5XS	5" x 1"	Extra Soft pad	\$ 9.95

GREX 105° Random Orbit Sander

The unique 105° angled head design of this **pneumatic sander** makes for easy access to the inside of bowls or platters. Comes with a 2" hook and loop pad with an optional 3" available, which use any standard hook and loop sanding discs.

Ergonomic housing with a comfortable padded grip. Lightweight and compact design helps prevent fatigue. One piece housing, precision milled steel gears, and a ball bearing motor provide smooth operation. Use our **Interface Pads** (shown at right) to sand inside and outside contours easily. Requires approximately 12 to 14 CFM @ 90 PSI.

GX-RO-200 \$ 99.95

NEW ** GREX Extension set - 3" and 5" in length.

GX-EXTS \$12.95

**GX-1VDH 1" Replacement pad \$ 8.95
GX-2VDH 2" Replacement pad \$ 12.95
GX-3VDH 3" Replacement pad \$ 15.95**

TIP: Pneumatic power sanders are lighter than their electric counterparts making them easier to maneuver and less likely to generate fatigue. Always use a water filter on your supply line and remember to insert a few drops of air motor oil during each day of use to increase tool performance and longevity.

Air-Vantage Pneumatic Random Orbit Sanders

These random orbit sanders will save you a lot of time in the finishing process and leave a great finish. Typical orbital sanders come with a 3/16" orbit - we carry this model with a 3/32" orbit. Essentially, it's like comparing a "coarse" or aggressive orbit with a "finer" one. The smaller orbit offers less vibration which is ideal for turners sanding delicate vessels, and they leave a finer finish than their counterparts. Use with our Interface Pads (shown above) to easily conform to inside and outside contours. Requires approximately 12 to 14 CFM @ 90 PSI.

We offer a 3" model and a 5" model.

See also our selection of pneumatic hoses and fittings on the next page.

Extend-A-Sand®

Developed by Virginia woodturner Bruce Hoover, the Extend-A-Sand provides a safe and comfortable method for sanding deep within closed forms and large bowls where you cannot reach easily with only a drill. The support allows the user to sand well beyond the normal reach of the drill and maintain firm stable control while doing so. The angle head model is designed for use with drills such as Sioux or Milwaukee low speed models and with our drill sold on a previous page (requires adapter shown below). This style of drill offers a comfort advantage over standard drills. The 3/8" Jacobs keyless chuck allows you to use any size Velcro disc holder, flap sander, mop sander, or other sanding attachment. Our universal model is designed to work on any drill that has a 3/8" chuck. Available in 16" and 26" lengths.

MANUFACTURED IN THE USA

This adapter will allow you to use our angle-head model on our 38D-01400 drill. Not required when using the Extend-A-Sand with a Sioux or Milwaukee drill.

Sanding Details is now a much easier task.

The Pfingst Micro Sander

The micro sander is for light duty detail sanding in areas that contain fine details and difficult to reach spots. The unit measures 1" in diameter and 3" long. The nylon sanding heads come in three sizes (3/8", 1/4", & 3/16" dia.). Each is about 3/4" long and is easily changed when needed.

Extra Nylon heads are \$3.00 each.

MS200LX \$185.00

Includes the micro sander, transformer, 3 nylon heads, 90 pre-cut sanding discs, and a heavy-duty combination speed control (rheostat).

MS100L \$ 90.00

Includes the micro sander, transformer, 3 nylon heads, 90 pre-cut sanding discs.

The combination rheostat shown at right can be used as a standard foot pedal, or place it on your workbench, lift up the pedal and use the dial underneath to preset the desired speed. This will eliminate fatigue in the legs.

Wolverine Sharpening Jig REPLACEMENT KNOB Kit

Anyone who owns an earlier model of the Wolverine sharpening jig with a plastic knob will surely appreciate this kit. Our replacement knob is solid, made from molded resin, with a threaded brass insert to add strength and durability. The knob has four lobes for easy grip even for those with arthritis. Kit includes 1 replacement knob with shaft and locknut plus a new leaf spring, and instructions.

WOLV-100 \$16.95

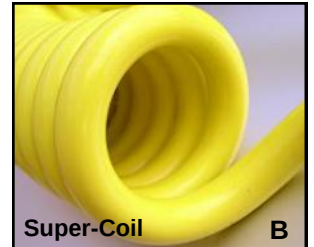

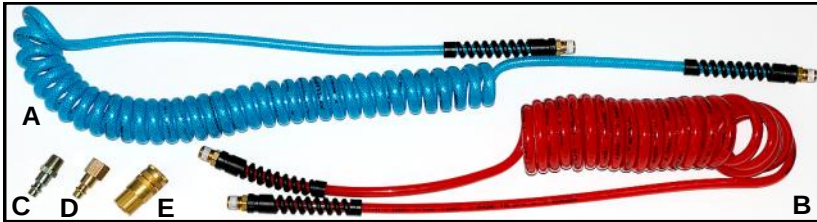

WOLV-100

Grinding Jig and gouge
NOT included.

Nycoil Pneumatic Hoses and Fittings

Supercoil® & Superbraid® Self-Storing Air Hoses are ideal for applications where kink and abrasion resistance are important considerations. Polyurethane's extreme flexibility and light weight combine to minimize user fatigue while its toughness and long lasting durability allow it to withstand rough handling. The state-of-the-art spring like strain relief fitting system further enhances both the performance and appearance of this high quality hose assembly. A must have addition to any shop with compressed air and pneumatic tools or blow guns. They are SUPER flexible - 100% kink proof with rugged brass swivel fittings, and 8" and 16" tails make connection to air supply and tools easier and eliminates tangling. On Supercoil® hoses the coil is approximately 2 3/4" diameter. Superbraid® hoses are made with Dacron Polyester Braiding for additional reinforcement. The coil is approximately 1 3/4" diameter.

TIP:

Install a water filter in your compressed air line to avoid damage to air tools, and keep water spatter off turnings, etc. It is also a good idea to install water drains at any low spots in your supply lines.

TITAN Compact Scroll Chuck

from **MULTISTAR**

Illustrated above shows
TCJ075 Jaws (purchased
separately)

- ★ **COMPACT POWER:** At only 83mm (3 3/8") dia it really lives up to it's 'Compact' name, whilst it's full size hardened scroll ring (same as a 100mm-4" engineering chuck) means no compromise on holding power, standards of performance, or accuracy.
- ★ **COMPACT DESIGN:** Specially designed to achieve the highest gripping power to size & weight ratio, and better work access & reduced lathe bearing loading.
- ★ **CONSTRUCTION:** Made throughout in '40 carbon tool steel, with hardened & tempered Jaw Carriers, Operating Scroll Ring, and Key for superior performance and chuck life.
- ★ **JAW MOUNTING:** Unique 3 mounting hole allows exclusive use of the more robust Cap Head Hexdrive Screws for superior strength & screw life, plus only one size of screw, with easy line of sight
- ★ **UNIQUE GUARD:** Safer working is ensured by enclosing the jaw slots, fully containing the jaw carriers, and controlling movement within sensible working limits. The guard also controls jaw carrier positions to make servicing easier, and less frequent by protecting against the ingress of debris.
- ★ **BUILT IN INDEXING:** All Titan Chucks feature 24 indexing holes. This useful facility will benefit you in almost any area of turning from simply holding the chuck steady for hole drilling, to advanced decorative work.

Chuck with a standard lathe fitting Body, Operating Key, Jaw Mounting Screws (inc two spares), Hexkey, and comprehensive instruction booklet.

NOTE: Jaws are not included in the chuck price.

- ★ **JAW RANGE:** The jaw range offers a wide choice of holding styles & options, with over 11mm (7/16") of movement, and full expansion and compression working on all jaws. Also thanks to direct line-of-sight screw access, all jaws can easily be changed using only one size of screw, & without any need to remove the Jaw Carriers, or worry about which jaw goes to which jaw carrier.

\$ 239.95

Please specify spindle size when ordering. 1" x 8tpi • 1 1/4" x 8tpi • M33 x 3.5mm

TCJ025 JAWS: These are the smallest universal jaws in the range, and feature a 12mm (1/2") bore with matching internal dovetails, which also provides good square holding on lace bobbin blanks, etc. The 25mm (1") external dovetails provide an excellent expansion hold with good working access, plus the bonus of parallel ribbing for gripping in a bore. Ideal for applications such as a peppermill, or making a quick mount for a bowl in a small offcut, etc.

\$ 49.95

TCJ055 JAWS: Their very thick section means a strong, non-flexing hold on a wide range of work whilst providing good projection to allow rear work access. The internal bore and dovetail is 35mm (1 3/8"), whilst the external dovetail is 55mm (2 1/4"). A matching Faceplate Ring (FPU55) compliments the jaws for first stage work preparation.

\$ 49.95

TCJ075 JAWS: The 'workhorse' jaws of the range, coping with everything from workpiece preparation on a Faceplate Ring, or Screwchuck, to finished product. Their powerful, close coupled design, means a very positive hold on any timber, making them the ideal choice for a wide range of Bowl and other work on their 75mm (3") external dovetails, or 50mm (2") internal dovetails.

\$ 49.95

TCJ092 "BULLDOG" JAWS: Powerful spigot gripping jaws at 70mm (2 3/4") diameter, combined with a 90mm (3 1/2") external dovetail form make these a formidable combination for larger work. Excellent for deep hollow forms, & other projecting work where unsupported holding is required. The serrated teeth have been relieved (milled away) to reduce surface resistance, and by so doing the effective 'bite' into the wood is greatly increased.

\$ 59.95

TCJ250 MOUNTING PLATES: 250mm (10") dia provides a larger base for self-made mounts, and rim gripping forms, etc. Amply provided for with 20 x M6 threaded holes + 12 mounting slots. Brass M6 csk screws are available, plus Plastic Dovetail Bosses (with captive M6 Screws) for direct work mounting. **\$ 99.95**

TCJ125 MOUNTING PLATES: Open up a wide range of mounting options with these 125mm (5") dia plates. Designed to take MDF or wooden holding forms for square bowls, flush bowl bases, picture frames, etc. Mounting is amply catered for with a total of twenty M6 threaded holes to take any suitable M6 screw. Plastic Dovetail Bosses (with captive M6 Socket screws) for direct work mounting are available, plus Brass M6 countersink screws for self-made holding forms. **\$ 79.95**

TCMB08 MOUNTING BOSSES: \$ 26.95

Dovetail form bosses in Acetyl Copolymer, with pre-fitted M6 Socket Screws, for use with TCJ90 Jaws, TCJ125 Plates, and TCJ250 Plates.

FACEPLATE RINGS: Faster, lower in cost, and more versatile than traditional faceplates, these solid steel rings end the need to remove the chuck because they mount directly on to the matching jaws in expansion mode. Available in the following four sizes:

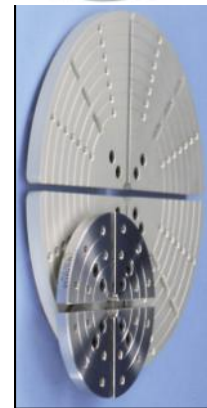

FPU55 fits TCJ055 + TCJ056 Jaws **\$ 20.95**
FPU75 fits TCJ075 Jaws **\$ 25.95**
FPU90 fits TCJ90 + TCJ092 Jaws **\$ 28.95**

TCSC18 SCREWCHUCK: An attractively priced 11mm (7/16") Centre Screw, with our unique Variform helix for a 'rock solid' hold. Loads direct to TCJ075, TCJ090, and TCJ092 Jaws. Illustration opposite shows the 11mm Centre Screw in TCJ075 Jaws.

\$ 19.95

Marlin Drive System

So what can Marlin do for you?

Tackle virtually any project with a wider choice of driving options.

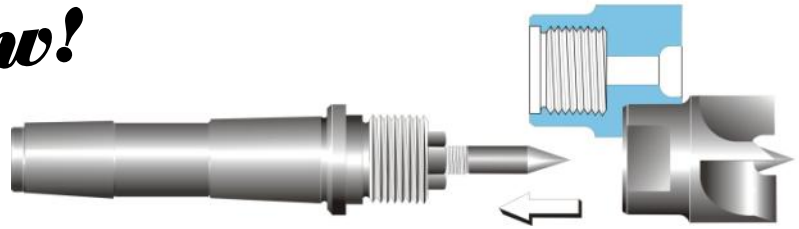

Quicker drive change - Shank can remain in Morse Taper.

Hardened prong drive heads mean easier indenting, less bearing strain, greater durability.

Adjustable Centre Pin - Easy set to suit hardness or preferences, and to re-sharpen or replace.

Change lathe or buy a second lathe with a different Morse Taper - No problem, only replace the Shank.

New!

This Marlin Drive System is smart choice. It requires only one arbor because all the drive heads are interchangeable.

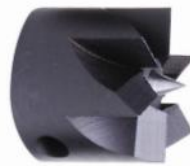

MD002 shank (arbor) with a #2 morse taper. Accepts all drive centers, cones, faceplate, screw chuck, shown on this page.

Fill voids & create designs in any wood project

New!

This innovative new product is an easy to use filler made of dyed sawdust. It sands more easily than stone inlay and other non-wood fiber materials. It's available in 16 various colors which range from subtle to vibrant, and give you endless options for not only filling cracks or voids, but to create designs as well. You are limited only by your imagination. It can help you salvage a bowl from the waste barrel by giving you an inexpensive option to repair and enhance a large crack or defect. You can use either thin CA glue or it can be mixed with 5-minute epoxy.

These adhesives are sold on page 5.

TIP: Small tools for pressing the filler into voids can easily be made by inserting nails with different size heads into a small turned handle.

Simply Insert the letter of the desired color after the part number.

Tompkins GAGE'T bowl gauge

The GAGE'T was designed by professional woodturner Keith Tompkins. It is designed to measure the wall thickness of bowls up to 20" in diameter, or to the center of bowls up to 17". The GAGE'T can also be used for measuring the thickness of plates and platters. Molded from glass filled nylon, it is virtually indestructible. The spring-loaded measuring pin rides along the exterior of the bowl, giving a direct reading of the wall thickness in 1/16" increments.

SLR-1400 \$27.95

Flexible Inspection Light

This light will allow you to easily inspect the interior of vessels and vases. By placing the light in the bottom of a bowl or vessel, it will cast a different shadow than a light shown from the outside and allow you to see turning and sanding marks you may have missed. Can also be attached to a hollowing tool help you see the cutting action.

FOREDOM® Flexible Shaft Machines

FOREDOM flexible shaft machines can give you the ability to multi-task in your shop. With a wide variety of accessories available you can carve, shape, detail, burnish, polish, and sand your projects. Foredom is a well known company established in 1922 offering quality products and service. We offer three kits that have been popular with woodturners over the last several years to allow you to pick the combination that best suits you.

FOREDOM 5240 Woodcarving Kit

This kit features the new SR series 18,000 rpm, 1/6 hp, ball bearing, hang-up style reversible motor (33% more powerful than previous SR motors), No. 44T Handpiece w/3/32", 1/8" & 1/4" collets, and FCT Control, and the Fur, Feathers and Fins instructional 3-disc DVD set with master carver Frank Russell. Also included is the No. 53 accessory kit. It includes a 47 pc. assortment including many of the latest items such as Radial Bristle Discs, Purple Ceramic Sanding Bands & Discs, Typhoon Burs, V Stones, Blue Stones and lots more. You get a Rotating Bur and Tool Holder for all shank sizes, plus a small round bur holder w/lid. The Motor and control carry a two year manufacturers warranty. Total Retail Value of \$457.

FT-5240-K \$239.00

1/6 HP

44T Handpiece Many users like to have an extra one or two handpieces on the bench for convenience to reduce constant changing of commonly used tool accessories.

FT-44T \$52.95

43T Handpiece This is 1" shorter than the popular 44T. It's size provides much easier access to confined interior areas. Also a good fit for users with smaller hands.

FT-43T \$52.95

FOREDOM 5400 Woodcarving Kit

This kit features Foredom's most powerful permanent magnet, TX series motor. It's rated 1/3 hp and achieves a top speed of 15,000 rpm, while delivering more torque throughout the entire speed range than any other flex shaft motor. Comes with the cast iron SXR-1 Speed Control, No. 44T Handpiece w/3/32", 1/8" & 1/4" collets, and the Fur, Feathers and Fins instructional 3-disc DVD set with master carver Frank Russell. Also included is the No. 53 accessory kit. It includes a 47 pc. assortment including many of the latest items such as Radial Bristle Discs, Purple Ceramic Sanding Bands & Discs, Typhoon Burs, V Stones, Blue Stones and lots more. You get a Rotating Bur and Tool Holder for all shank sizes, plus a small round bur holder w/lid. The Motor and control carry a two year manufacturers warranty.

Total Retail Value of \$563. **FT-5400-K \$339.00**

1/3 HP + More Torque

We can special order any FOREDOM kit for you that we do not stock.

Visit www.foredom.com
Browse the possibilities and let us know what you like and we'll save you 15% on the kit of your choice.

FOREDOM SRM Motor w/44T Handpiece

We designed this custom kit just for woodturners. It features the new SR series 18,000 rpm, 1/6 hp, ball bearing, **bench style** reversible motor (33% more powerful than previous SR motors), with **Integrated Speed Control**. Comes with a standard 39" shaft and sheath, and a No. 44T Handpiece w/3/32", 1/8" & 1/4" collets. This style can be more convenient because it is

easily moved to where ever it is needed. Can be placed on the lathe bed for easy access when carving or sanding a turning on the lathe, and relocated to the workbench when needed. Combined retail value of \$314.00

FT-SRM1-K \$249.00

No. 28 Handpiece This is a slender, comfortable design with a tapered grip. Ideal for intricate & light applications where a more delicate touch would be useful.

FT-28H \$52.95

Table Top Controllers are very popular with many users. They eliminate the fatigue sometimes experienced with using a pedal controller. Set the desired speed and it will remain steady as you work. Constructed using solid state electronics in a tough plastic housing, with a dial for precise speed settings.

FT-EM (use with SR series motors) \$56.95

FT-EMX (use with TX series motors) \$71.95

Additional **FOREDOM®** Accessories

MH-5 Motor Hanger features a solid rod with mounting clamp for attaching to any bench up to 2-1/4" thick. The rod height can be easily adjusted. It also comes with a handpiece rest (HR-2) that secures your handpieces when not in use (see inset photo)

FT-MH-5
\$39.00

M-7 Motor Hanger has a telescoping design for easy height adjustment. The pole screws allow the user to adjust the motor height and to swivel position. Comes with a fixed mounting base and 3 screws for attaching to bench tops.

FT-MH-7

Rotary Power Chisel Handpiece Set

Foredom's chisel handpiece gives a power assist to carving projects in all types of wood. This handpiece has a contoured

body design that features a rugged plastic barrel and tapered aluminum ends. Recommended for use with 1/3 HP Series TX or 1/6 HP Series SR motors, and attaches to any flex shaft machine with a standard key tip shaft. The Chisel Handpiece must be used only in the forward motor direction. Optimum Speed Range—3,000-10,000 rpm. Measures 6" long, 1" in diameter. Comes with a set of 6 pre-sharpened steel cutters.

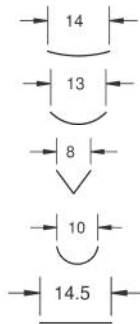

1. Gouge #3, Sweep Shallow Cut
2. Gouge #7, Sweep Deep Cut
3. Gouge #11, Sweep "U" Cut
4. Parting Tool "V" Cut
5. Chisel #1, Straight Single Bevel
6. Chisel #2, Skew Single Bevel

FT-50C-S \$79.00

5-Piece Chisel Set This set of larger chisels makes a well rounded addition to the 6-piece set that comes with the 50C Handpiece.

1. Gouge #3, Sweep Shallow Cut
2. Gouge #7, Sweep Deep Cut
3. Parting Tool "V" Cut
4. Gouge #8, Sweep Deep Cut
5. Chisel #1, Straight Single Bevel

Rotating Bur Holders will hold and organize over 100 tool accessories. 7" wide by 4" high. Burs not included.

FT-10080 \$14.95

3M Scotch-Brite™ Radial Bristle Discs

These radial bristle discs are designed for wood or metal applications and will allow you to sand in places that have been unreachable up to now. Excellent for de-burring, de-fuzzing and sanding of irregular surfaces. 80 and 120 grits can be used for shaping, 220 for fine sanding, and 400 will finish up and bring a sheen to the wood surface.

SEE OUR COMPLETE SELECTION ON PAGE 10

FT-10082 \$14.95

This bur holder has a cup in the top for storing small hand tools.

Sleeveless Cushioned Sanding Drums

Our sanding drums are an exceptional value. There are no sleeves to buy. Using the supplied template, simply cut to size any abrasive sheet you want to use and install using the locking cam. There is a cushioned surface under the abrasive making them ideal for sanding contours. Each has a steel shank, and is most commonly used in flexible shaft machines such as the Foredom models, or in a drill if desired.

Sanding surface dim.	Shaft	Part #	Price

**Inflatable Round Sander**

Inflate the sander using the hand pump shown below. Varying the pressure will vary the softness to suit any application. Sleeves are available in 4 grits (below).

KA-11341 \$39.95

Micro Hand Pump

Required to safely inflate the round sander. Use of compressed air can damage

the sanders. The best pressure is as soft as possible while keeping the sleeve from moving on the drum

KA-11320 \$9.95

Lancelot Chain Discs

These are designed for use on 4 1/2" angle grinders with a 5/8" arbor. They take a lot of the hard work out of woodcarving. The 14 tooth model is preferred for "roughing out" work while the 22 tooth will yield a smoother finish. A standard chainsaw file can be used to sharpen the teeth when needed. 13,000 RPM Maximum rating.

**Guinevere Total Sanding System**

This system uses two inflatable rubber sanders, flat and round, each with four sanding sleeves, from coarse to extra fine, fitted either to a flexible shaft or the quiet 1/2 HP motor. The inflatable sanders are ruggedly built from Swedish steel and heavy rubber. This system easily eliminates your laborious hand sanding process, saving you

countless hours of work while providing a silky smooth finish on your pieces. System also includes a hand pump and a cleaning stick.

KA-11340

\$279.00

Guinevere Basic Sanding Kit

This accessory selection is ideal for difficult profiles, finishing projects such as carvings, boxes, bowls, decoys, furniture, spoons, intarsia, and more. The round dome shaped sander is particularly well suited for interior curved surfaces on bowls, platters, etc. The kit includes:

- ◆ Inflatable Round Sander - 2 3/8" x 1 9/16"
- ◆ 4 Round Sanding Sleeves - Coarse to Extra-Fine grit
- ◆ Inflatable Drum Sander - 2 1/2" x 1 3/4"
- ◆ 4 Drum Sanding Sleeves - Coarse to Extra-Fine grit
- ◆ Micro Hand Pump & Cleaning Stick

KA-11360 \$99.00

MERLIN Miniature Power Carving Tool Set

Merlin "The World's Smallest Chain Saw" is a miniature woodcarving set that features an 8-tooth saw chain that is 2" in diameter. Set contains a Proxxon variable speed mini grinder and 5 different accessories in a molded case. Versatility is the theme here as you will find many uses for this including carving, shaping, texturing, and sanding on your projects. Let your creativity flourish.

KA-10005

\$189.00

**Guinevere Replacement Sanding Sleeves**

Every sanding sleeve is made to specifically to fit each inflatable sander. The sanding cloth material is highly flexible and made of the very best quality for sanding not only wood, but also metals, plastic, bone and horn. On the round sander, the overlapping design on the sanding sleeves is to ensure longevity and optimum effectiveness in awkward places. As the sanders are both round and soft, the tendency for them to clog is very low. The sharpness of the abrasive lasts a long time, however, we highly recommend using a cleaning stick to considerably extend the working life of each sleeve. They are available in individual grits or as an assortment.

Remember to always keep some spares on hand.
